RETAILER

Starts any vehicle quickly with 55" long reach cables.

Internal battery status gauge.

Easy to pack along and use.

RESCUE[®]

Portable Power Pack

PRODUCT SPECIFICATIONS

**12V
Commercial Power Pack**

**Model
3000**

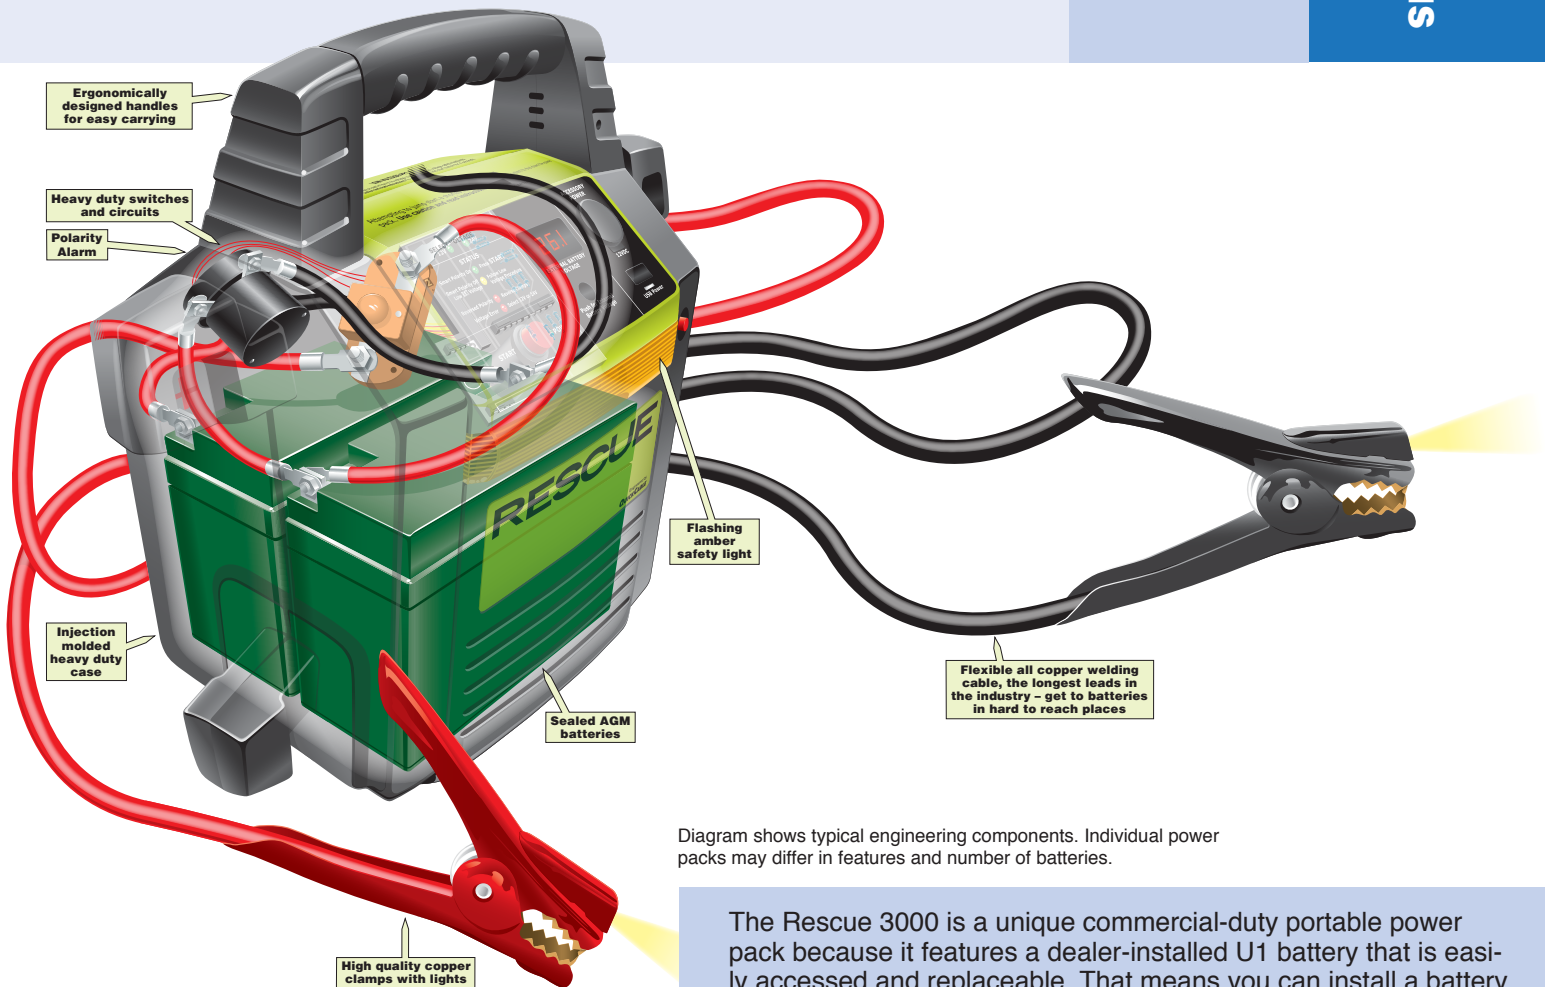

Diagram shows typical engineering components. Individual power packs may differ in features and number of batteries.

The Rescue 3000 is a unique commercial-duty portable power pack because it features a dealer-installed U1 battery that is easily accessed and replaceable. That means you can install a battery with upwards of 340 CCA for plenty of jump starting power when you need it.

Like all Rescue power packs, the Rescue 3000 is engineered for maximum performance: all copper welding cables over 4-1/2' long, mechanics style clamps with LED lights so you can see inside a dark engine compartment, a polarity alarm in case it is accidentally hooked up wrong, a work light/flasher, and a built-in battery charger. There's also a 12V power outlet protected by a self-resetting circuit breaker.

With the Rescue 3000 you can start cars, light trucks, RV's and all sorts of powersports equipment. It's built to perform to professional demands, and it's only from Quick Cable.
